GMX international, Inc.
13771 Roswell Ave, Suite A
Chino, CA 91710
Att: Sharon Costanzo, CEO

Dear Sharon:

After installing your GMX Magnetic Fluid Conditioning Devices in our entire home, both on the domestic water, and on our heating system, the results were really positive. Both myself, and my wife Molly were so impressed with the product, and the professionalism at that GMX that we inquired about opportunities with the corporation and since have become Sales Representatives for GMX International, Inc. right here in the New England Area.

We read all the claims regarding its effect on fossil fuels and how it could save up to 20% on fuel consumption. Per GMX's direction we installed (3) of the 400's on our Direct Vent Oil Fired Boiler. This particular heating system is one of the most difficult in the industry to tune properly, and keep emissions to a minimum. We wanted to be sure it worked so we requested our Boiler Technician, who we have been dealing with for years to help us with this evaluation. He used a recently calibrated digital meter to measure both flame temperature, and CO2 Emissions both before and after the installation. The results were amazing, the flame temperature increased by .9 degrees, and the CO2 emissions drop to practically nothing. Immediately the amount of fuel was adjusted down, a hotter flame resulted in more heat from less fuel.

Regarding the water, my wife Molly came to me and commented that her problem with dry skin, and an itchy scalp after taking a shower has pretty much disappeared. The water actually tasted so much better and as a result the coffee, and tea we make with it tastes better also. Her house plants are thriving and growing practically up to the ceiling.

We believe that what separates GMX International, Inc. from their competition is the fact that they have a pattern on their design, they have the best design, and it's the quality of the design that attributes to 45% of the magnets effectiveness on the fluid.

Great job GMX, we look forward to a long and prosperous business relationship between our two corporations. Phone calls are welcome.

Kind regards,

Corporate Sign / Seal

Michael J. Panarelli
Director of Marketing & Sales
