CERTIFICATE

Seawater passing through the GMX water conditioner was found to improve the quality reducing the algal bloom. The turbidity of the water is considerably reduced and maintaining water clarity. The level of hazardous materials was kept very low. Experiments conducted showed that harmful microflora has removed and the water quality was superior to the untreated water. Asian seabass fish reared in GMX conditioned, grew 30% faster than the control. Results of the study showed the beneficial effect of the GMX water conditioner in the Aquaculture practices under controlled conditions.
