RE: History of Energy Savings

A **12 month** history of energy savings for Summersville Presbyterian Church
March 1, 2010 to February 28, 2011.

This **8500 Square Ft.** Edifice, heated with a 7 year old "**Smith**" **700,000 BTU,**
17.5 HP cast iron boiler using **428.3 thousand cubic feet** of natural gas during
the period .

The line was equipped with **three #848 GMX magnetic units** on **March 1, 2010**
near the "in feed" on code approved **stainless steel flexible "gastite".**

The results were **95,600 cubic feet less** gas consumed than during the previous 12
month period. Resulting **in gas savings of 16.5%** and a **dollar savings of**
\$810.00 or 18.4%.

The numbers are confirmed by comparing monthly invoices/meter readings by
Columbia Gas, together with heating degree days from National Weather Service.
